BRISTA Screen for wheelbarrow — Simply attach and carelessly sift

Not only is our screen for wheelbarrows easily attached, but also detached from the wheelbarrow. It consists of a hot-dip galvanized expanded metal wire mesh with a stable angular frame. The inclination of the diamonds offers excellent screening features, allowing you to apply your sieved compost easily to the designated spot.

Part #	Description	Length (mm)	Width (mm)	Surface
001117	Screen for wheelbarrow	1000	600	hot-dip galvanized
