Smart accessories: lid and bottom for composters

To prevent your compost from being rumbled and eaten by birds, rats, mice and pets, simply seal your composter- top and bottom, with lid and bottom. This is how you ensure that only bacteria, worms and other micro-organisms „taste“ your compost.

Part #	Description	Length (mm)	Width (mm)	Surface
001124	lid/bottom for compost	800	800	hot-dip galvanized
